

十、上下文菜单 contextmenus

请先向 manifest.json 文件添加 "contextMenus" 权限。

manifest.json:

```
"permissions": [  
  "contextMenus"  
],
```

创建父子菜单：

```
let parent = chrome.contextMenus.create({  
  title: 'Test parent item',  
  id: 'parent'  
});  
chrome.contextMenus.create({  
  title: 'Child 1',  
  parentId: parent,  
  id: 'child1'  
});
```
